Consumer & Insurance

Consumer and Insurance pretax income was \$63 million in the quarter versus \$45 million in the third quarter of 2013, and up from \$60 million in the second quarter of 2014⁶.

Consumer net finance receivables reached \$3.6 billion at September 30, 2014, an increase of 21% from September 30, 2013 and 6% from June 30, 2014, driven by the company’s focus on increasing personal loan originations through its branch network and diversifying its product offerings. Consumer net finance receivables per branch continued to grow, reaching \$4.3 million at September 30, 2014, up from \$4.1 million at June 30, 2014 and \$3.6 million at September 30, 2013.

Net interest income of \$196 million increased 30% from the prior year quarter, driven by 20% growth in average net receivables and strength in consumer yield of 27.02%. Net interest income increased 9% from the prior quarter. Yield in the current quarter continued to benefit from the change in the state-by-state mix of loan originations. Risk adjusted yield, representing yield less net charge-off rate, was 22.34% in the quarter, up 45 basis points from the third quarter of 2013 and 43 basis points from the second quarter of 2014.

The annualized net charge-off ratio was 4.68% in the quarter, versus 4.03% in the prior year quarter and 5.12% in the prior quarter⁷.

The annualized gross charge-off ratio was 5.46% in the quarter, up 117 basis points from the prior year quarter and down 34 basis points from the second quarter 2014. Recoveries continued to normalize in the quarter at 78 basis points versus 26 basis points in the third quarter of 2013, following the sale of a pool of previously charged-off accounts in June 2013⁷.

The 60+ delinquency ratio was 2.55% at quarter end, versus 2.32% in the prior year quarter and 2.28% in the prior quarter.

⁶ Consumer and Insurance segments reflect historical accounting basis (which is a basis of accounting other than U.S. GAAP). Pretax income excludes impact of charges related to accelerated repayment / repurchase of debt.

⁷ The recovery and charge off ratios for 3Q13 include a \$1.6 million adjustment for the subsequent buyback of certain personal loans resulting from a sale of our previously charged-off finance receivables in 2Q13.

Acquisitions and Servicing

The Acquisitions and Servicing segment contributed \$39 million to the company's consolidated pretax income in the quarter⁸. The entire Acquisitions and Servicing segment generated pretax income of \$74 million in the quarter, with net interest income of \$113 million and yield of 24.26%⁹. Actual net finance receivables at quarter-end were \$2.1 billion, down from \$2.2 billion at June 30, 2014. The principal balance of the portfolio was \$2.7 billion at quarter-end versus \$2.9 billion at June 30, 2014.

The annualized net charge-off ratio was 5.31% in the quarter, versus 8.58% in the prior year quarter and 7.07% in the prior quarter.

The annualized gross charge-off ratio was 5.83% in the quarter, down 307 basis points from the prior year quarter and down 195 basis points from the second quarter 2014, largely due to the slower pace of portfolio run-off. Recoveries continued to improve in the quarter at 52 basis points versus 32 basis points in the third quarter of 2013.

The delinquency ratio for the Acquisitions and Servicing segment was 5.11% at the end of the quarter, an increase of 7 basis points from the prior quarter end.

Legacy Real Estate and Other Non-Core

Excluding gains from the recent sales¹⁰, the Non-Core Portfolio (consisting of legacy real estate loans) and Other Non-Core activities generated a pretax loss of \$50 million in the quarter, including a pretax loss of \$48 million attributable to the legacy real estate loan portfolio¹¹. Other Non-Core activities resulted in a loss of \$2 million in the quarter.

Liquidity and Capital Resources

As of September 30, 2014, the company had \$2.8 billion of cash and highly liquid investment securities. The company had total outstanding debt of \$7.9 billion at quarter-end, in a variety of debt instruments.

⁸ Excludes impact of one-time items related to fair value adjustments on debt and earnings attributable to non-controlling interests..

Use of Non-GAAP Measures

We report the operating results of our Core Consumer Operations, Non-Core Portfolio and Other Non-Core using the same accounting basis that we employed prior to 2010 when we were acquired by Fortress (the “Fortress Acquisition”), which we refer to as “historical accounting basis,” to provide a consistent basis for both management and other interested third parties to better understand our operating results. The historical accounting basis (which is a basis of accounting other than U.S. GAAP) also provides better comparability of the operating results of these segments to our competitors and other companies in the financial services industry. The historical accounting basis is not applicable to Acquisitions and Servicing since this segment resulted from the purchase of the SpringCastle Portfolio on April 1, 2013 and therefore, was not affected by the Fortress Acquisition.

Pretax Core Earnings is a key performance measure used by management in evaluating the performance of our Core Consumer Operations. Pretax Core Earnings represents our income (loss) before provision for (benefit from) income taxes on a historical accounting basis and excludes results of operations from our Non-Core Portfolio (legacy real estate loans) and other

non-originating legacy operations, gains (losses) resulting from accelerated long-term debt repayment and repurchases of long-term debt related to Consumer, gains (losses) on fair value adjustments on debt related to Core Consumer Operations (attributable to Springleaf) and results of operations attributable to non-controlling interests. Pretax Core Earnings provides us with a key measure of our Core Consumer Operations' performance as it assists us in comparing its performance on a consistent basis. Management believes Pretax Core Earnings is useful in assessing the profitability of our core business and uses Pretax Core Earnings in evaluating our operating performance. Pretax Core Earnings is a non-GAAP measure and should be considered in addition to, but not as a substitute for or superior to, operating income, net income, operating cash flow, and other measures of financial performance prepared in accordance with U.S. GAAP.
