Liquidity and Capital Resources

As of December 31, 2016, the company had \$579 million of cash and cash equivalents, which included \$264 million of cash and cash equivalents held at our regulated insurance subsidiaries or for other operating activities that is unavailable for general corporate purposes. The company had undrawn conduit financing facilities of \$4.8 billion and had total outstanding debt of \$14.0 billion at December 31, 2016, in a variety of debt instruments.

Use of Non-GAAP Financial Measures

We report the operating results of our Consumer and Insurance segment, Acquisitions and Servicing segment, Real Estate segment, and Other using the Segment Accounting Basis, which (i) reflects our allocation methodologies for certain costs, primarily interest expense, loan loss reserves and acquisition costs to reflect the manner in which we assess our business results and (ii) excludes the impact of applying purchase accounting (eliminates premiums/discounts on our finance receivables and long-term debt at acquisition, as well as the amortization/accretion in future periods). These allocations and adjustments currently have a material effect on our reported segment basis income as compared to GAAP. We believe the Segment Accounting Basis (a basis other than GAAP) provides investors a consistent basis on which management evaluates segment performance.

Consumer and Insurance adjusted pretax earnings, Consumer and Insurance adjusted net income, Consumer and Insurance adjusted earnings per diluted share, Acquisitions and Servicing adjusted pretax earnings, Real Estate adjusted pretax earnings and Other adjusted pretax earnings are key performance measures used by management in evaluating the performance of our business. Consumer and Insurance adjusted pretax earnings, Acquisitions and Servicing adjusted pretax earnings, Real Estate adjusted pretax earnings and Other adjusted pretax earnings represents income (loss) before provision for (benefit from) income taxes on a Segment Accounting Basis and excludes acquisition-related transaction and integration expenses, net gain (loss) on sales of personal and real estate loans, net gain on sale of SpringCastle interests, SpringCastle transaction costs, losses resulting from repurchases and repayments of debt, debt refinance costs, and net loss on liquidation of our United Kingdom subsidiary. Management believes these non-GAAP financial measures are useful in assessing the profitability of our segments and uses these non-GAAP financial measures in evaluating our operating performance. These non-GAAP financial measures should be considered supplemental to, but not as a substitute for or superior to, income (loss) before provision for (benefit from) income taxes, net income, or other measures of financial performance prepared in accordance with GAAP.

The foregoing list of factors that could cause actual results, performance, or achievements to differ materially from those expressed in or implied by forward-looking statements does not purport to be complete and new factors, risks and uncertainties may arise in the future that are impossible for us to currently predict.
